

Children Run Better Unleaded

Lead at the Bunker Hill Superfund Site and exposure in Idaho's Silver Valley

Hosted by the Northwest Toxic Communities Coalition, Silver Valley Community Resource Center and University of Washington Superfund Research Program

Webinar – Tues, Oct. 13 | 12 noon PST

Lead contamination linked to the Bunker Hill Superfund Site has been a cause of concern to health officials and citizens in Idaho's Silver Valley for decades. Hear from experts and advocates about the dangers of childhood lead exposure, how to test your garden for lead, and efforts to establish a community lead health clinic in the Silver Valley.

Dr. Steven Gilbert
UW Department of Environmental and Occupational Health Sciences and member of Idaho's Medicaid Lead Screening Advisory Committee.

Rhonda Kaetzel
Regional Director, U.S Agency for Toxic Substances and Disease Registry, host of the soilSHOP Toolkit for lead screening in garden soil.

Barbara Miller
Director of the Silver Valley Resource Center, home of the Children Run Better Unleaded Program and efforts to establish a community lead health clinic.
